Summary

I'm a motivated Front-end Developer with 1.5+ years of experience building modern, responsive web applications using React.js, Next.js, and TypeScript. Skilled in UI development with Tailwind CSS, ShadCN UI, and Ant Design, as well as API integration and authentication systems. Passionate about creating clean, efficient, and user-friendly interfaces while continuously improving my skills toward full-stack development.

Experience

Limsa (Frontend developer)   08.2024 – 05.2025

● Developed the admin panel for the [Oson Ish Top](#) mobile application, allowing administrators to efficiently manage users, job listings, and platform content. Utilized RTK Query for optimized data fetching and caching, implemented performance enhancements through React optimization techniques, and built a modern, responsive UI with a clean and consistent design system.

● Developed a scalable admin panel for the *psyedu.uz* education platform, enabling administrators to efficiently manage modules, lessons, and assign tests. Built a responsive and user-friendly UI with Tailwind CSS, integrated RESTful APIs using Axios, and maintained global state with Zustand. Enhanced application performance and rendering efficiency by utilizing React optimization hooks such as useCallback and useMemo.

● Developed and maintained the product management module of an internal CRM system, enabling administrators to manage thousands of products including batch numbers, quantities, prices, and images. Implemented advanced features such as Excel import/export, real-time search and filtering, and dynamic table updates. Built a responsive and intuitive UI using Tailwind CSS.

● Developed [goldentoursuzbekistan.com](#) , a modern and scalable travel agency platform along with its admin panel. Built a clean, responsive, and high-performance user interface using Tailwind CSS for the main website and Ant Design for the admin dashboard. Focused on creating dynamic functionality, intuitive UI/UX, and efficient data management through seamless API integration and component optimization.

● Contributed to multiple client projects, including [klimat-servis.uz](#) and [revmacenter.uz](#) , built with Next.js to ensure high performance, SEO optimization, and scalability. Integrated Google Analytics for traffic monitoring and user behavior tracking. Delivered clean, responsive, and fast-loading interfaces aligned with best UI/UX and SEO practices.

● Alongside my development work, I actively engage in mentoring aspiring front-end developers, driven by a strong passion for teaching and knowledge sharing. Over the past few months, I successfully guided a React group of 5 students, 4 of whom secured jobs even before completing the course. Currently, I'm mentoring a new group of around 20 students progressing toward the React level. I believe that discipline, determination, and insight are the key ingredients to achieving real results.

Getter IT Innovation company - (Frontend developer)   04.2024 – 07.2024

● Developed and contributed to a web-based event management platform within a professional team environment, delivering a modern, responsive, and user-centric interface accessible across all devices. Applied contemporary UI/UX principles to enhance usability, streamline workflows, and improve overall user engagement and satisfaction.

Skills

Technical skills: JavaScript, ReactJs, NextJs , Tailwind CSS, Bootstrap, MUI, Ant Design,Framer Motion, Trillo, Redux , Redux-Toolkit, HTML5, CSS3, Zustand, React-hooks, Git, Socekt.io

Languages: Uzbek (Native Speaker), English (B2).

Education

Tashkent State University of economics(Economist)	08.2020 — 05.2025
Najot Talim (Frontend , ReactJs)	09.2023 — 04.2024
